

2022 Public Attitude Survey of Canadian Nuclear Laboratories' Chalk River Site.

Survey of Pontiac and Renfrew Counties | Summary
Conducted by Nanos for the Canadian Nuclear Laboratories, February 2022
Submission 2022-2052

Canadian Nuclear
Laboratories
Laboratoires Nucléaires
Canadiens

Key Findings

1

CONFIDENCE IN CRL STAFF

Residents of Pembroke, Renfrew, and Pontiac Counties are over three times more likely to say they are confident than not confident that the staff at the Chalk River Laboratories site have followed the necessary regulatory review process in developing their proposal for a safe Near Surface Disposal Facility at Chalk River (mean of 6.4 out of 10) and that they can construct and operate the low-level waste disposal facility safely (mean of 6.4 out of 10). Pembroke residents report the highest level of confidence (mean of 7.0).

2

AWARENESS OF CNL

Over eight in ten residents of Pembroke, Renfrew, and Pontiac Counties have heard of Canadian Nuclear Laboratories (84%). Pembroke residents are most likely to have heard about CNL (92%) than those from Pontiac (80%) or Renfrew (76%).

3

AWARENESS OF CRL

Awareness of Chalk River Laboratories has increased since 2018 with over nine in ten residents of Pembroke, Renfrew, and Pontiac Counties having heard of it (94% compared to 85% in 2018).

4

AWARENESS OF PROJECTS

Awareness of the site revitalization (2022: 58%; 2018: 47%), the Near Surface Disposal Facility (NSDF) (2022: 55%; 2018: 47%), and the Small Modular Reactors (SMRs) (2022: 40%; 2018: 29%) currently underway or being discussed at Chalk River Laboratories has increased among residents of the three counties since the previous wave of research in 2018.

Q

There is currently a proposal to construct and operate a safe Near Surface Disposal Facility at the Chalk River laboratories site for the permanent disposal of low-level waste. This is before the Canadian Nuclear Safety Commission which regulates the use of nuclear energy and materials to protect health, safety, security and the environment.

Mean

On a scale from 0 to 10 where 0 is not at all confident and 10 is completely confident, how confident are you that:

6.4

“

Residents of Pembroke, Renfrew, and Pontiac Counties are over three times more likely to say they are confident than not confident that the staff at the Chalk River Laboratories site have followed the necessary regulatory review process in developing their proposal for a safe Near Surface Disposal Facility at Chalk River (mean of 6.5 out of 10) and that they can construct and operate a low-level waste disposal facility safely (mean of 6.4 out of 10).

Awareness of Nuclear Power Demonstration Closure Project

Q

Have you heard or not heard of the Nuclear Power Demonstration (NPD) Closure Project currently underway or being discussed at Chalk River Laboratories?

“Awareness of the Nuclear Power Demonstration (NDP) Closure Project currently underway or being discussed at Chalk River Laboratories has decreased since 2018 among residents of Pembroke, Renfrew and Pontiac Counties. Residents of Renfrew County are less likely to have heard of this than residents from the other two counties.”

*Weighted to the true population proportion.

*Charts may not add up to 100 due to rounding.

*The net score is the difference between all positive and negative numbers in a question.

Source: Nanos Research, RDD dual random telephone survey, February 9th to February 16th, 2022, n=475, accurate 4.5 percentage points plus or minus, 19 times out of 20.

Awareness of Small Modular Reactors

Q

Have you heard or not heard of the Small Modular Reactors (SMRs) currently underway or being discussed at Chalk River Laboratories?

Awareness of the Small Modular Reacts (SMRs) currently underway or being discussed at Chalk River Laboratories has increased since 2018 among residents of Pembroke, Renfrew and Pontiac Counties, with four in ten having heard of them (40%) in 2022 compared to under three in ten in 2018 (29%). Men are more likely to have heard of SMRs (53%) than women (29%).

*Weighted to the true population proportion.

*Charts may not add up to 100 due to rounding.

*The net score is the difference between all positive and negative numbers in a question.

METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) random telephone survey of 511 residents of Renfrew and Pontiac Counties, 18 years of age or older, between February 9th and 16th, 2022. Participants were randomly recruited by telephone using live agents and administered a survey. The sample is geographically stratified to be representative of Renfrew and Pontiac Counties.

Individuals were randomly called using random digit dialing with a maximum of five call backs.

The margin of error for a random survey of 511 residents of Renfrew and Pontiac Counties is ± 4.4 percentage points, 19 times out of 20.

The research was commissioned by Canadian Nuclear Laboratories and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

METHODOLOGY – Previous Wave

Nanos conducted an RDD dual frame (land- and cell-lines) random telephone survey of 750 residents of Renfrew and Pontiac Counties, 18 years of age or older, between November 10th and 20th, 2018. Participants were randomly recruited by telephone using live agents and administered a survey. The sample is geographically stratified to be representative of Renfrew and Pontiac Counties.

Individuals were randomly called using random digit dialing with a maximum of five call backs.

The margin of error for a random survey of 750 residents of Renfrew and Pontiac Counties is ± 3.6 percentage points, 19 times out of 20.

The research was commissioned by Canadian Nuclear Laboratories and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	Canadian Nuclear Laboratories	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Renfrew and Pontiac Counties. See tables for full weighting disclosure
Population and Final Sample Size	511 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media prior to administering the survey to ensure the integrity of the data.
Type of Sample	Probability	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines could not participate.
Margin of Error	±4.4 percentage points, 19 times out of 20.	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Renfrew and Pontiac Counties.
Mode of Survey	RDD dual frame (land- and cell-lines) random telephone survey	Estimated Response Rate	Seven percent, consistent with industry norms.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across the three counties.	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Demographics (Captured)	Pembroke, Renfrew, and Pontiac; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Content	All questions asked are contained in the report.
Fieldwork/Validation	Live CATI interviews with live supervision to validate work.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Number of Calls	Maximum of five call backs.	Research/Data Collection Supplier	Nanos Research
Time of Calls	Individuals were called between 6:30-9:30pm local time for the respondent.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Field Dates	February 9 th to 16 th , 2022.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/		

nanos dimap analytika

NANOS RUTHERFORD McKAY & Co.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

This international joint venture between [dimap](http://www.dimap.com) and [Nanos](http://www.nanos.co) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

NRM is an affiliate of Nanos Research and Rutherford McKay Associates. Our service offerings are based on decades of professional experience and extensive research and include public acceptance and engagement, communications audits, and narrative development. www.nrmpublicaffairs.com

2022-2052 – Canadian Nuclear Laboratories – Chalk River Survey W2 – STAT SHEET

There is currently a proposal to construct and operate a safe Near Surface Disposal Facility at the Chalk River laboratories site for the permanent disposal of low-level waste. This is before the Canadian Nuclear Safety Commission which regulates the use of nuclear energy and materials to protect health, safety, security and the environment.

2022-2052 – Canadian Nuclear Laboratories – Chalk River Survey W2 – by Awareness of CNL – STAT SHEET

There is currently a proposal to construct and operate a safe Near Surface Disposal Facility at the Chalk River laboratories site for the permanent disposal of low-level waste. This is before the Canadian Nuclear Safety Commission which regulates the use of nuclear energy and materials to protect health, safety, security and the environment.

2022-2052 – Canadian Nuclear Laboratories – Chalk River Survey W2 – by Proximity to CRL – STAT SHEET

There is currently a proposal to construct and operate a safe Near Surface Disposal Facility at the Chalk River laboratories site for the permanent disposal of low-level waste. This is before the Canadian Nuclear Safety Commission which regulates the use of nuclear energy and materials to protect health, safety, security and the environment.

			Have you, a family member, or a close friend ever worked at the Chalk River Laboratories site? [Select as many as apply]
